Diferencias de resultados por el uso del **truncador** (\*)

El \* al final de la palabra sirve para que SCOPUS busque las diferentes **variantes de la palabra**.

Ejemplo:

**Nutrition / nutritionS = nutrition\***

# Uso del truncador

Puede usar comodines cuando no se está seguro de la ortografía, o cuando la palabra tiene variantes, o si está buscando productos químicos. Hay dos tipos de caracteres comodín, ? y \*.

? Representa un único carácter

Ejemplo: **wom?** recupera tanto a la **woman** y **women**

\* Representa cualquier número de caracteres, incluso cero

Ejemplos: **comput\*** devuelve **computer**, **computers**, **computerize** and **computerization**.

\*tocoferol encuentra **α**-tocoferol, **γ**-tocoferol, **-**tocoferol, tocoferol, etc.

Query 4 is highlighted with an orange box and contains the formula: (AF-ID ("Universidad Nacional Mayor de San Marcos" 60071231)) OR (AF-ID ("Universidad Peruana Cayetano Heredia" 60071237)). Above the main search area, there is a 'Combine queries...' button, also highlighted with an orange box, which contains the text '#1 OR #3'. To the right of this button, there is a text input field with the placeholder 'e.g. #1 AND NOT #3'. The main search area displays the results for the selected query (query 4), showing '8,072 document results' and several icons for actions like RSS, notifications, save, edit, and delete.

Las palabras clave= **(multidrug\* W/3 resistant\*) OR TITLE ( drug\* W/3 resistant\*)** son muy genéricas se pueden confundir con otros tipos de fármacos: **Herbidas, insectidas, insulina y antineoplásicos.**

Para **evitar** esto se debe restar las palabras que causan ruido o arrojen resultados erróneos.
